

Falcon Shield

Gain deeper visibility and control over your software as a service (SaaS) stack to prevent, detect and respond to SaaS threats

Secure Your Entire SaaS Stack

Stay Ahead of Security Misconfigurations

Integrate with all SaaS apps to monitor and manage security misconfigurations through in-depth security checks and auto/step-by-step remediation

Build a Stronger Identity Security Posture

Strengthen governance of internal and external SaaS users, monitor permissions and secure non-human accounts

Discover Connected and Shadow Apps

Detect and control all sanctioned and unsanctioned SaaS apps and other integrations connected to your core SaaS stack that can pose a risk to your business

Manage Device Risk

Track all devices connecting to your SaaS stack and associate them with individual users

Get a Handle on GenAI

Take control of GenAI tools in your SaaS stack to prevent data leakage and unauthorized access

Detect and Respond to Threats

Detect and respond to identity-centric threats originating from the SaaS ecosystem such as unusual activities, malicious applications or any indication of compromise

Falcon Shield is the only SSPM with out-of-the-box support for over 150 SaaS applications

About CrowdStrike

CrowdStrike (Nasdaq: CRWD), a global cybersecurity leader, has redefined modern security with the world's most advanced cloud-native platform for protecting critical areas of enterprise risk — endpoints and cloud workloads, identity and data.

Powered by the CrowdStrike Security Cloud and world-class AI, the CrowdStrike Falcon® platform leverages real-time indicators of attack, threat intelligence, evolving adversary tradecraft and enriched telemetry from across the enterprise to deliver hyper-accurate detections, automated protection and remediation, elite threat hunting and prioritized observability of vulnerabilities.

Purpose-built in the cloud with a single lightweight-agent architecture, the Falcon platform delivers rapid and scalable deployment, superior protection and performance, reduced complexity and immediate time-to-value.

CrowdStrike: We stop breaches.
