

FRONTIER AI READINESS AND RESILIENCE SERVICE

Use frontier AI-powered scanning and expert prioritization to find and fix exploitable vulnerabilities faster.

AI is finding vulnerabilities faster than your team can remediate them.

AI-powered tools are accelerating vulnerability discovery and exploit development faster than most security programs can respond. What once required significant manual effort can now be accomplished at machine speed and scale, increasing the volume of findings while shrinking the window between disclosure and exploitation. Organizations that fail to adapt are leaving their most critical assets exposed while remediation capacity struggles to keep up.

The CrowdStrike Frontier AI Readiness and Resilience Service is a subscription built to close that gap. Powered by CrowdStrike's premier access to frontier cyber models and industry-leading expertise, the service helps organizations scan for exploitable vulnerabilities, prioritize findings with skilled red teamers, and accelerate remediation with guided recommendations and trusted partner support.

Key benefits:

Exploitable-Driven Prioritization: CrowdStrike red teamers prioritize true positives and help focus remediation on the findings most likely to be weaponized.

Guided Remediation: Recommendations span Falcon® for IT mitigations, Charlotte Agentic SOAR workflows, and trusted partner support for code-level fixes.

Continuous Coverage: A renewable 12-month subscription keeps your vulnerability program current as threats evolve.

Flexible Consumption: Redeem CrowdStrike Falcon® Flex dollars for a scalable, cost-efficient path to on-going security.

Key capabilities and delivery details

The CrowdStrike Frontier AI Readiness and Resilience Service follows a structured, phased delivery model designed to address vulnerabilities at every stage of the software development lifecycle.

Scan for exploitable vulnerabilities

Powered by CrowdStrike's premier access to frontier cyber models, the service scans a defined scope of applications and code bases for potential vulnerabilities.

Prioritize

CrowdStrike red team experts review findings with your team to prioritize issues based on exploitability, adversary risk, and business impact.

Guide remediation

CrowdStrike recommends multi-modal actions, including updating detections and applying mitigations via Falcon for IT. Code-based fixes are handled by trusted service partners or your internal development team.

Outcomes

- Ongoing visibility into vulnerabilities across in-scope applications and code bases
- Findings prioritized by risk and adversary exploitability
- Faster, more systematic remediation backed by CrowdStrike technology and partner expertise
- An on-going scan-and-remediate cycle built for AI-compressed exploit windows

Why choose CrowdStrike?

CrowdStrike has assisted countless organizations in assessing cybersecurity programs to address the specific factors that matter in today's evolving threat landscape.

Premier access to frontier cyber models

CrowdStrike uses premier access to frontier cyber models to help identify exploitable vulnerabilities at the speed modern threats demand.

Red team access

Expert red teamers help focus remediation on the findings most likely to be weaponized.

Remediation that moves beyond reporting

CrowdStrike combines guided recommendations, Falcon-powered mitigations, and trusted partner support to help teams reduce exposure faster.

About CrowdStrike Services

CrowdStrike Services delivers Incident Response, Technical Assessments, Training and Advisory Services that help you prepare to defend against advanced threats, respond to widespread attacks and enhance your cybersecurity practices and controls.

We help our customers assess and enhance their cybersecurity posture, test their defenses against real-world attacks, respond to incidents, accelerate forensic investigations and recover from a breach with speed and precision. Harnessing the power of the CrowdStrike Security Cloud and the CrowdStrike Falcon® platform, we help you protect critical areas of enterprise risk and hunt for threats using adversary-focused cyber threat intelligence to identify, track and prevent attacks from impacting your business and brand.

CrowdStrike: We stop breaches.
