Period

Proactively Prevent Identity-Based Threats to Protect Your Organization

- Block lateral movement, credential abuse and overprivileged accounts.
- 50% reduction in risk of a breach yields a \$696K benefit over 3 years.

Streamline Security Operations and Free Up Resources

- Detect and respond to threats faster, allowing the security team to focus on what's most important.
- Streamlined security operations and reduced false positives provide a \$144K benefit over 3 years.

Maximize ROI While Reducing Costs Across Operations

- Improve your security posture, lower cyber insurance premiums and help your business scale.
- \$167K saved by eliminating legacy tools and reducing SOC labor costs over 3 years.

“We had a penetration test done. Falcon Identity Protection was the first in detecting the attack, and it did it within 10 minutes. That was remarkable.”

VP of Information Security, Pharmaceutical

“The alerts are near real time, actionable, and don't have a lot of false positives. Previously, it sometimes took 4 hours to respond, whereas now we know in less than 10 minutes. From alert to triage to close, it usually takes less than an hour.”

VP of Information Security, Pharmaceutical

“Cyber insurance costs have gone down significantly. Insurance companies have a strong emphasis on privileged account monitoring and protection, which Falcon Identity Protection covers for us. We provide visibility into what they're being used for and show that we have controls to ensure they are not exploited.”

Director of Cyber Security Risk and Compliance, Hospitality
