A CROWDSOURCED COMMUNITY
for IT Security Professionals & Organizations

CONNECT. LEARN. SECURE.
"The more knowledge we have as a collective, the safer we all are."
SIMPLY PUT, WE ARE HERE TO HELP YOU. NO STRINGS ATTACHED.

We educate and connect the IT security community through the power of people and crowdsourced threat intelligence.

Consortium Networks is committed to providing businesses with the most relevant, up-to-date technology information, with a focus on cybersecurity. By connecting technology customers, vendors, and experts, we strive to be the go-to resource for guidance regarding all your IT requirements. We are the first organization dedicated to providing real-world feedback and data on solutions in operation in production environments at peer organizations.
Who We Are
AND WHO WE HELP

Consortium provides the knowledge and tools IT security professionals need to overcome the challenges they face every day. Through our no-cost resources, we provide expert operational know-how, crowdsourced intelligence platforms, threat training, and more. In addition, we are a trusted reseller of top-notch security products—all which are extensively evaluated by our team before adding to our suite of offerings.

You can think of us as an all-inclusive, key source of technology information, which helps you sort through the myriad of security offerings while creating valuable business relationships and providing a means to do your job more effectively.
CISOS & TECHNOLOGY PROFESSIONALS

We provide the latest technology content, expertise, product information, and product reviews. We know that the best evaluation and advice around technology comes from the subject matter experts that use the products every day. Therefore, we connect like-minded technology professionals to leverage their combined knowledge to add clarity and ease the frustration of choosing the right security products and solutions.

IT VENDORS: EMERGING & ESTABLISHED

Emerging vendors can present their products to a group of CISOs to obtain feedback and exposure. Established vendors can showcase their latest solutions and/or products and take advantage of crowdsourced information to learn how their offerings are being used in live operations.

OUR COMMUNITY

Consortium is committed to recognizing and helping others in both our work and personal communities. We are a veteran-owned business built on honesty, integrity, moral principles, and high ethical standards. We infuse these values into every aspect of our company and community.
How We Help IT PROFESSIONALS

Consortium offers multiple ways to help individuals and organizations in the cyber security field with challenges, security posture, relationships, and a means to do your job more effectively.

The best part is...most of what we offer is totally free, with no strings attached.

CONSORTIUM X: SOLUTION INTELLIGENCE EXCHANGE

- No-cost
- Membership Portal

Provides crowdsourced and expert information that allows you to make informed decisions when looking for new security solutions. Members can get information on the latest threats; view security product reviews, unbiased security vendor solutions, and product evaluations; and receive crowdsourced peer feedback.

CONSORTIUM Z: THREAT INTELLIGENCE PLATFORM

- No-cost
- Cloud-based

An intelligence aggregation platform that enables you to quickly check your indicators against known malicious activity.
Consortium partners with other trusted companies that offer products that fill a gap in the security space and add measurable value and results for our customers. Before we add a partner technology, all products are vetted and evaluated by our team of veteran security professionals.

CONSORTIUM DNS

- No-cost
- Membership Platform

A low latency DNS filtering service that uses domain history and threat intelligence to prevent traffic from malicious, dormant, and newly active domains.

THE BRIDGE: EXECUTIVE LEVEL COLLABORATION

- No-cost
- Membership Platform

Brings together a group of 200+ C-Level executives in CISO, CSO, and CIO roles to collaborate and share information around technology solutions and use cases to help solve strategic problems.
GETTING INVOLVED
TRAINING & NETWORKING & COMMUNITY

HANDS-ON THREAT TRAINING

Consortium Networks is the first organization to offer complimentary, high-quality threat hunting training. Through our free training sessions, our goal is to develop a culture of cybersecurity awareness. We firmly believe in educating those in the cybersecurity field and know training is a critical part in reducing the risk of a cybersecurity attack. Our training sessions simulate data breach incidents and give participants the opportunity to test their organization’s ability to respond in the event of an attack using formal policies and procedures.
COMMUNITY COMMITMENT

Consortium is committed to recognizing and helping others in both our work and personal communities.

A few causes we support are:

- Feeding the Homeless
- Adult & Teen Challenge—Helping End Addiction
- Alstrom Strong
- Crossing Borders—Compassion for Refugees
- International Centre for Missing & Exploited Children (ICMEC)
- Families of FBI Special Agents
- CLLF USA

NETWORKING EVENTS

We believe that developing strong relationships and having a well-established network is vital to the success of your career. Our networking events are aimed at creating relationships first, while providing memorable experiences in which cyber security professionals can meet like-minded professionals.
We are strong supporters of the women who are making great contributions in the world of technology. Our series, Story Behind the Story: Empowering Women in Cyber Security, tells the inspiring stories of successful women who chose to make a career of protecting people and data from cyber threats. This ongoing series of interviews conducted by Deborah Feyerick, award-winning National Correspondent and former CNN anchor/reporter, profiles female cyber security executives and charts the path that brought them to their current roles in the cyber security arena.

Our Leadership

COMMITTED, EXPERIENCED & HUMBLE

LARRY PFEIFER
Founder

With over 26 years of experience in IT and cybersecurity, Larry Pfeifer is recognized as a leader in helping people and organizations to solve their IT and security-related issues. As a proud New Jersey native, Larry joined the Navy in 1993 and started a career in IT. After serving his country, he held positions at Widener University, Nortel, Philadelphia Stock Exchange, BlueCoat Systems, and CrowdStrike. Working as an end-user, manager, engineer, sales engineer, account manager, and sales manager has given Larry a 360-degree view of all sides of IT.

Larry started Consortium with one goal—helping people. His altruistic views came from organizing a feeding the homeless program in Camden, NJ. From there, he founded Consortium Networks as an avenue to continue to help its members, partners and others.

TIM MURPHY
President & Chief Executive Officer

Tim Murphy leads Consortium Networks’ strategic direction, operations, cybersecurity solution development and client services. With 35 years of public and private sector experience—primarily in the Federal Bureau of Investigation—Tim is a recognized leader in global cybersecurity and intelligence. In his role as Deputy Director of the FBI, Tim oversaw the operational and administration aspects of a workforce that was more than 35,000 strong, spread throughout 56 national offices and more than 60 international offices. His experience covers all operational aspects of the Counterterrorism, Counterintelligence, Criminal, Cyber and Intelligence Programs.
