

DRAGOS INDUSTRIAL CONTROL SYSTEMS CYBERSECURITY

OVERVIEW

Dragos is an industrial cybersecurity (ICS/OT/IIoT) technology company that provides comprehensive, passive visibility of industrial environments and assets, rapid intelligence-driven threat detection through analytics, and step-by-step investigation playbooks.

THE PROBLEM

Threats to industrial organizations are increasing in frequency and sophistication, resulting in targeted attacks that can cause significant financial impact, operational downtime, and most importantly potential loss of human life.

2015

UKRAINE

First successful attack on electric infrastructure

2016

CRASHOVERRIDE

Second successful attack on electric infrastructure

2017

TRISIS

First attack on safety instrumented systems

THE SOLUTION

The Dragos Platform provides industrial organizations with comprehensive asset ID, threat detection, and response capabilities, giving the organizations an unparalleled understanding of their ICS environments, the threats they face, and the step-by-step knowledge to respond to threats.

DRAGOS TECHNOLOGY

Backed by The Dragos Intelligence and Threat Operations teams, the Dragos Platform is continuously codified with the knowledge of our expert team, so defenders are empowered to become more independent, security teams can scale their resources, and organizations are armed with the most comprehensive approach for holistic ICS defense.

The Benefits

INDUSTRY'S MOST IN-DEPTH ICS VISIBILITY

Deep Packet Inspection (DPI) of ICS protocols & behaviors, host logs, data historians, controller events, characterizations, traffic flows, and anomalies provide a complete view of ICS environments and assets

RAPID, ACCURATE THREAT DETECTION

Threat detection via threat behavior analytics derived from unique intelligence of adversary behaviors, as well as machine learning-enabled anomaly detection, configuration detection, and indicator-based detection

FASTER RESPONSE TO THREATS

Investigation playbooks authored by the Dragos Professional Services team transfer knowledge and best practices to supplement security teams' experience and provide step-by-step guidance for faster response to potential threats

THE DRAGOS DIFFERENCE

Dragos is comprised of the industry's most experienced team of ICS security practitioners. Our team has been on the front lines of every significant industrial cybersecurity attack globally, including the 2015 and 2016 Ukraine attacks, CRASHOVERRIDE, and TRISIS.

Leveraging our boots-on-the-ground experience, our technology, threat intelligence, and professional services help foster your industrial security team's development to comprehensively prepare for, respond to, and prevent severe breaches in ICS environments.

AWARDS, PARTNERS & INVESTORS

Dragos is recognized as the industry's leading ICS cybersecurity provider, and we are proud to partner with organizations who further our mission of Safeguarding Civilization
