

YOU have a growing security problem.
WE have a solution: Active Defense for your Enterprise of Things.

It seemed to happen overnight. While you were busy taking care of business, your organization became a veritable **Enterprise of Things** (EoT). PCs, mobile systems, cloud workloads and other traditional endpoints. Agentless IoT and OT devices. Diversity is thriving at the cost of security as your users connect from all over the map – literally.

Forescout is the leader in Enterprise of Things security. We provide the only solution that actively defends the Enterprise of Things at scale by **identifying, segmenting and enforcing compliance of every connected thing on your heterogeneous network**. The Forescout platform deploys quickly on your existing infrastructure – without requiring agents, system upgrades or network changes.

WHAT WE SOLVE:

Forescout provides a Zero Trust platform for:

Network Access Control

Enforce and automate policy-based controls with or without 802.1X.

IoT Security

Don't just see IoT problems, fix them – fast.

Network Segmentation

Simplify and accelerate Zero Trust segmentation.

OT Security

Manage OT risk and compliance without disruption.

Asset Inventory

Manage and secure every connected thing using a real-time asset inventory.

Device Compliance

Evaluate and reach compliance with confidence.

Security Orchestration

Extend the value of your security and IT investments.

“Forescout is like having an automatic threat hunter on the team that hunts for threats around the clock across our global network. Tasks that would have taken hours now take just minutes.”

NICK DUDA
PRINCIPAL SECURITY ENGINEER

“The amount of information we get from the Forescout platform is incredible. It is by far the best tool I have ever used to find, identify and control systems properly.”

JOSEPH CARDAMONE
SR. INFORMATION SECURITY ANALYST

“Forescout provides JPMorgan Chase & Co with enhanced visibility across a wide range of devices, securing hundreds of thousands of endpoints that connect to our network.”

DANA DEASY
GLOBAL CISO

WHY FORESCOUT:

- Get 100% device visibility in days and policy-based access control and segmentation in weeks with fast, flexible, non-disruptive deployment.
- Start with complete visibility and move to control, segmentation and Zero Trust policy enforcement.
- Gain agentless posture and risk assessment – no agents to deploy, manage or repair.
- Simplify and automate compliance to pass audits and avoid fines/penalties.
- Use your existing infrastructure and tools without being forced to upgrade software or hardware.
- Avoid 802.1X complexity, deployment delays and operational costs.
- Increase security operations productivity with a context-aware, real-time asset inventory and security automation.
- Boost ROI using plug-and-play integrations with IT and security products you already own.
- Support 2 million+ endpoints per deployment with the most widely deployed and scalable solution for agentless device visibility and control.
- Improve device classification and risk analysis with the Forescout Device Cloud, the world’s largest crowdsourced data lake of device fingerprints.

FORESCOUT STATS:

Industry

Enterprise of Things security

Customers

- More than 3,800 enterprises and government agencies in over 90 countries*
- 27%+ of the Global 2000
- NPS Score: 82*

Employees

1,000+ worldwide*

CEO

Michael DeCesare

Headquarters

San Jose, California

Our Mission

Actively defend the Enterprise of Things by identifying, segmenting and enforcing compliance of every connected thing.

Our Vision

The Enterprise of Things – Secured.

*As of June 30, 2020

Don't just see it.
Secure it.
