The new standard of identity for the new way of work.
More than 7,500 global organizations trust Okta to manage access and authentication.
Okta Platform Services
Use Okta’s modular Platform Services to build faster, customize more easily, and connect to third-party apps and systems to enhance security and user experience. These Platform Services are available in Okta's packaged products, APIs, and SDKs.
Workflows
Okta Workflows automates identity-centric processes like employee onboarding and offboarding using conditional logic.

Identity Engine
Okta Identity Engine powers customizable access experiences, including authorization, authentication, and registration.

Devices
Okta Devices collects device identity and context for use in access decisions and passwordless experiences.

Directories
Okta Directories securely stores users and attributes at scale.

Integrations
Okta Integrations includes the integration frameworks, templates, and tools that make it easy for apps to connect to Okta.

Insights
Okta Insights aggregates, analyzes, and disseminates data from Okta and our partners.
Workforce Identity: Protect and enable your employees, contractors, and partners, wherever they are.
**Single Sign-On**
A single set of credentials gives your people access to enterprise apps in the cloud, on-premises, and on mobile devices.

**Universal Directory**
Deploy a flexible, cloud-based user store to customize, organize, and manage any set of user attributes.

**Lifecycle Management**
Automate user onboarding and offboarding with seamless communication between directories and cloud applications.

**Adaptive Multi-Factor Authentication**
Secure your apps and VPN with a robust, risk-based policy framework and a set of modern second-verification factors.

**Advanced Server Access**
Extend core Okta identity and access to your Linux and Windows servers via SSH & RDP in an elegant manner, built for the modern cloud.

**API Access Management**
Secure enterprise data and enable developers to focus on the user experience.

**Access Gateway**
Extend Okta to protect your on-premises apps and protect your hybrid cloud—without changing how your apps work today.
Organizations use Okta to enable a remote workforce.
400,000 employees can now connect to critical applications amid increased demand.

The Okta Identity Cloud enables FedEx’s global workforce of essential and now-remote employees to securely access more than 250 cloud applications.
Customer Identity: Build secure, delightful digital experiences for your customers.
Authentication
Embed secure login and single sign-on for custom applications.

Authorization
Control which APIs your users and developers have access to with fine-grained, standards-based authorization policies.

User Management
Add user sign up to your apps and manage customer identities at scale via APIs or from Okta's user-friendly admin console.

Adaptive MFA
Provide additional layers of strong authentication using a comprehensive set of intelligent policy parameters and multifactor authentication.

Lifecycle Management
Automate workflows tied to the lifecycle state of your customers.

B2B Integrations
Effortlessly integrate with enterprise directories or identity providers.

Access Gateway
Embed modern authentication into web apps—without having to change code.
Organizations use Okta to improve the omnichannel fan experience.
9 months from initial discussion to launch day

A frictionless omni-channel experience that can scale to meet the demands of millions of fans
Over 6,500 pre-built integrations to applications and your marketing, security, appdev, and privacy tools.
Why do customers love Okta?
“My relationship with Okta is a partnership. Okta is always happy to talk about new features and new technologies, and it's not about ‘what can we sell you,’ it’s about ‘how can we better your organization.’ Overall, my experience with Okta has been 100% positive.”

– Joe Dropkin, Priceline
About Okta
