Solve Cybersecurity Complexity

with Optiv Innovation

The Complexity Problem
The increasing complexity of standalone approaches has resulted in several issues:

3,000,000 CYBERSECURITY JOBS UNFILLED BY 2021

33% MORE BREACHES
Q3 2018 vs Q3 2019

Skills Shortage
The cybersecurity skills shortage is growing; unfilled cybersecurity jobs are expected to exceed three million by 2021.¹

Increasing Numbers of Organizations Breached Annually
A larger attack surface triggers more business and cybersecurity operational complexity. The global breach count increased 33% year over year from Q3 2018 to Q3 2019.²

Difficulties Measuring Program Effectiveness
Effective cybersecurity reporting should include updates on risk, revenue impact, productivity, strategic impact of the program, cost and return on investment.

Why We’re Different
Optiv is a global security solutions integrator singularly focused on cybersecurity. The word Optiv stems from “active” and “operative”, alluding to our goal of helping you understand your options and providing what you need to successfully execute. Our unique approach focuses on optimizing and rationalizing existing security programs to transform how to procure, consume, integrate, implement and operationalize cybersecurity.

Our capabilities extend throughout the cybersecurity lifecycle and help global organizations plan, build and run successful cybersecurity programs that: right-size technology spend, optimize operations, reduce risk and align with business goals.

“I have a high degree of confidence in Optiv as a partner. They are not just a vendor, it’s truly a partnership.”
— Manufacturing Client

The Optiv Advantage

Certified Professionals
ISO27001, GDPR, FFIEC, DFARS, PCI, HIPAA, GLBA, NIST, EI3PA, NYDFS and more

500+ technology consultants on staff

Expertise in 50+ OEM technologies

10,000+ security technology projects delivered annually

More than 90% of projects delivered successfully, on time and under budget

How We Solve Complexity

Optiv’s approach extends throughout the complete cybersecurity lifecycle, to help businesses:

1. Optimize and streamline spending through innovative consumption models
2. Integrate operations to deliver on-demand scale
3. Automate cybersecurity environments to leverage cloud economics
4. Architect solutions focused on outcomes and business alignment

Our comprehensive global services span six core areas and enable businesses to achieve cyber resilience.

THREAT MANAGEMENT

- Strengthen your security posture by identifying vulnerabilities and malicious activity faster, reducing threat actor dwell time and building security in from the start.
- Threat Detection and Response
- Secure Infrastructure
- Adversarial Emulation

SECURITY OPERATIONS

- Attain greater flexibility in your cybersecurity consumption, with Cyber as-a-Service delivery of Identity, Risk, Threat and Digital Transformation solutions.
- Cyber Authorized Support Services
- Intelligence Operations
- Advanced Fusion Center
- Managed Security Services
- Detection and Response

IDENTITY AND DATA MANAGEMENT

- Ensure the right people access the right data – in the right manner – maintaining trust and compliance.
- Access Management
- Data Governance and Protection
- Identity Governance

CYBER DIGITAL TRANSFORMATION

- Assure digital transformation success with a business and risk-aligned architecture that adapts to your needs.
- Cloud Security
- Orchestration and Automation
- Product Security
- Analytics and Big Data

RISK MANAGEMENT AND TRANSFORMATION

- Reduce risk by aligning your security program with business needs.
- Privacy and Governance
- Cyber Resilience
- Risk Optimization

INTEGRATION AND INNOVATION

- Our integrated approach expands your security procurement options, addresses complex security challenges and aligns better to unique business requirements.
- Endpoint Security
- Cloud Security
- Core IT Infrastructure
- Network Security
- Security Intelligence
- Data Security
- Application Delivery
