

# CSF360 CLOUD: CYBERSECURITY WORKSHOP

*The Presidio National Cybersecurity Team has developed a free CSF360 Cloud Security Workshop. The workshop is based on the NIST-CSF Framework and is designed to help document and provide a consultative, flexible, and comprehensive approach to security operations enterprise-wide.*

## CLIENT CHALLENGES

Organizations need a comprehensive approach to Cloud Security, but it is challenging to know where to begin. With multiple, overlapping tools deployed in the enterprise, it can be difficult to see the whole picture. Security talent and leadership are tough to recruit and retain. Frequent turnover has caused many gaps in enterprise strategies and solutions.

## OUR SERVICE

Cloud and Cybersecurity Experts from Presidio lead a high-level discussion using the NIST-CSF Framework. We bring stakeholders from multiple teams together to understand your Cloud Security posture. We will lead a discussion and interview your team in a group setting. Our experts will help you find the gaps in your cloud security technology solutions and business processes. We will document our findings in a live whiteboard session and provide our expert recommendations to improve cloud security operations enterprise-wide.

## WHAT'S INCLUDED

- Interactive group whiteboard session with a Presidio Security Practice Lead or Cybersecurity Consultant
- Summary of documented current security controls mapping back to the NIST-CSF Framework
- List of expert recommendations on ways to optimize Security posture across your organization
- Opportunity for follow-up sessions to provide our roadmap of suggested next steps to address current risk

## KEY BENEFITS:

- A common ground for Cloud Security risk management
- A list of Cloud Security activities that can be customized to meet the needs of any organization
- A complementary guideline for an organization's existing Cloud Security program and risk management strategy
- A risk-based approach to identifying Cloud Security vulnerabilities
- A systematic way to prioritize and communicate cost-effective improvement activities among stakeholders
- A frame of reference on how an organization views managing Cloud Security risk management

## TARGET AUDIENCE

- Companies that may have a cloud security project roadmap but no formal way of measuring progress.
- Companies that have done self-assessments but would like another pair of eyes to review their efforts.
- Companies that have policies but may not be following them as closely as they would like
- Security Leadership: CISO, CSO, CIO, CXO
- Security Team: Architecture, Engineering, Operations, SOC, Analyst
- Networking Team: Firewall Admins
- Data Center Team: Directory Server Admins, Email, Identity, Access
- Cloud Team: Cloud Architects, Cloud Engineers
- Application Team: DevOps, SRE

## COSTS AND DURATION

- Engagement Time: 2 - 3 Hour(s)
- Remote or In-Person
- Cost: \$0

## WHY PRESIDIO

Presidio's Cybersecurity organization exists to accelerate and surpass our clients' business objectives by building confidence in digital interactions. We believe every corporate role is a security role, and that everything we do must take security into consideration. Whether consulting on a digital transformation journey or moving workloads into the cloud, assessing and identifying risk is always front and center. Scaling organizational trust and confidence while securing critical digital assets isn't simply something we can do, it's inherent in what we do.
