**FALCON SPOTLIGHT**

A new approach to vulnerability assessment

The fastest and simplest solution to decrease risk and exposure, close security gaps and be better prepared to respond to attacks

CrowdStrike® Falcon Spotlight™ offers security teams a real-time assessment of vulnerability exposure on their endpoints that is always current. Falcon Spotlight’s native integration into the CrowdStrike Falcon® platform enables customers to operate vulnerability assessment within a complete endpoint protection framework. Falcon Spotlight adds preparation and readiness to the unparalleled prevention, detection and response provided by the Falcon platform, resulting in a stronger security posture and unprecedented breach protection.

**KEY BENEFITS**

- **Integrated Protection:** Spotlight is a key part of CrowdStrike’s comprehensive and unified endpoint protection platform. With Spotlight and the Falcon platform, not only can you see your security gaps, you see which gaps your adversary is targeting, arming you with the proactive protection you need to block advanced attacks.

- **Comprehensive Visibility:** Spotlight requires no scanners to deploy and manage and no new agents — just turn it on and start seeing results. Spotlight gives you visibility across your enterprise, whether endpoints are physical or virtual, on- or off-premises, or on-the-move.

You receive unparalleled visibility into vulnerabilities across your distributed enterprise without compromise.

- **Effortless:** Spotlight delivers always up-to-date information seamlessly, putting it into the hands of security analysts. This helps you improve response time and reduces the effort required to understand your security posture and become more proactive.

- **Zero-impact:** CrowdStrike’s cloud-native architecture enables constant visibility into endpoint vulnerabilities without the need for cumbersome and resource-intensive network or host scans.

Falcon Spotlight is the industry’s first scan-less endpoint vulnerability assessment solution. Built on the Falcon platform, it delivers timely, zero-impact assessments of endpoint security posture and provides on-demand access to the results, enabling security teams to make better decisions, faster.

Provides holistic protection that bridges the gap between vulnerability assessment and threat prevention

Offers seamless cloud-native deployment requiring no additional agents or new infrastructure

Delivers timely, up-to-date knowledge on demand

Provides zero-impact, scan-less assessment
Falcon Spotlight solves the challenges that plague traditional vulnerability assessment and management solutions by delivering the following benefits:

**SEAMLESS INTEGRATION WITH THE FALCON PLATFORM**

**Connects the dots**
Tight integration with other Falcon modules means you can quickly pivot between vulnerability information, incidents details and endpoint activities, not only in real time but also historically.

**Prevent while you patch**
The Falcon platform mitigates the risk from vulnerabilities that cannot be patched quickly by preventing and detecting exploit attempts as well as post exploitation activities. This buys you precious time to patch your systems against future attacks.

**NO SCANNERS, NEW AGENTS OR SCANS**

**Eliminate scanning**
Falcon Spotlight uses the Falcon agent to continuously monitor the vulnerability status of endpoints and stream data to the cloud, eliminating the need for scheduled scans while still providing complete visibility into vulnerabilities.

**Visibility everywhere**
Spotlight monitors all endpoints via the Falcon sensor, whether on- or off-network, on-premises, off-premises or in the cloud and on both physical and virtual endpoints.

**Zero impact on performance**
Vulnerability management is scan-less and vulnerabilities are identified in the cloud with no additional impact to endpoints or the network.

**CLOUD-DELIVERED**

**Easy deployment**
As part of the Falcon platform, Falcon Spotlight does not require the installation of additional agents, management infrastructure or management consoles, making deployment easy and efficient.

**Immediately operational**
Falcon Spotlight can be deployed instantly for unrivaled time-to-value. As soon as it is installed, it hits the ground running, monitoring and identifying vulnerabilities across your organization without requiring reboots, query writing, staging or complex configuration.

**Seamless, cloud-based protection**
Leveraging CrowdStrike's cloud-native architecture, Falcon Spotlight gives security teams the power to protect systems — whether those systems are on-premises, off-network or in a cloud environment.
