

CROWDSTRIKE SERVICES

INCIDENT RESPONSE | PROACTIVE SERVICES

Today's cyber attackers are becoming increasingly more sophisticated, constantly evolving their attack plan and employing strategies that allow them to circumvent common defenses employed by enterprises and government entities and masquerade as legitimate users.

The **CrowdStrike Services** team is a strategic partner for organizations before, during and after a cyber attack. We help them strengthen your defenses, increase detection and implement prevention capabilities, and respond quickly when attackers are wreaking havoc. Additionally, we understand that cyber security needs to enable business operations versus prohibit it, and we implement our services with specific corporate culture and risk prioritization in mind.

CROWDSTRIKE SERVICES DELIVERS THE PROTECTION YOU NEED TO DEFEND AGAINST AND RESPOND TO SECURITY INCIDENTS.

CROWDSTRIKE SERVICES

At CrowdStrike, we recognize that every organization is unique. So too are their information security needs. Our consultants are internationally recognized experts in incident response and remediation, malware analysis & research, information security strategy and intelligence analysis and have worked with countless organizations and government agencies to address their security issues. Whether you are fighting an attacker in your environment or are looking to prevent that battle before it begins, CrowdStrike can address your specific needs.

We regularly respond to security breaches for organizations of all sizes, working with them to develop highly customized response and remediation plans that balance the business and security needs of the company. CrowdStrike can also work with you to improve your overall security preparedness, leveraging our intelligence capabilities to identify the attackers most likely to target you.

INCIDENT RESPONSE AND REMEDIATION

QUICKLY DETERMINE THE SCOPE OF AN ATTACK, IMMEDIATELY START REMEDIATION, AND RESUME BUSINESS OPERATIONS FASTER

Blending our real-world incident response and remediation experience with cutting-edge technologies, CrowdStrike identifies and tracks attackers in near-real time. Our focus is on quickly mitigating unauthorized access to your environment, so that your organization can resume normal business operations faster. Our consultants have responded to incidents perpetrated by nation-state actors, organized crime groups, hacktivists and malicious insiders.

WHAT MAKES US DIFFERENT?

ACCELERATE YOUR RECOVERY TIME AND BEGIN REMEDIATION PLANNING ON DAY ONE.

We partner with your team to develop a customized response and remediation plan that takes into consideration your operational needs, your existing investments, and your existing resources. This ensures a thorough investigation and a specific remediation plan that balances the business and security needs of the company.

PROACTIVE SERVICES

Anticipate threats, prepare your network, and improve your team's ability to prevent damage from cyber attacks

CrowdStrike's portfolio of proactive services covers the spectrum from tactical to strategic. We'll take on the role of an adversary to identify security gaps within your organization, or sit next to your executives as we develop and mature the path to security.

We utilize intelligence collected from attackers, other clients, and incidents occurring across the globe in each of our proactive services exercises. Armed with a deep understanding of how attackers gain and maintain access to a victim's network, we emulate known attacker activity to test the security and readiness of your network and team. At the conclusion of the exercise, we provide tailored recommendations for how to improve your overall preparedness in the event of a security breach.

COMPROMISE ASSESSMENT

Identifies if outside attackers have previously or currently breached your network, and if so, who those attackers are and what they have access to.

NEXT-GENERATION PENETRATION TEST

Our Red Team emulates attackers that are relevant to you. Using actual tools, tactics and procedures utilized by those adversaries most likely to target you, we conduct a simulated attack and mock-compromise your organization, before providing recommendations on how you can improve your security.

PROGRAM DEVELOPMENT

Our team's expertise allows us to impact change in each of three areas: general information security, incident response planning and response and Security Operations Center (SOC) development. Regardless of your level of maturity, we'll develop a roadmap to make sure you continue to improve over time.

TABLETOP EXERCISES

Designed to provide realistic, scenario-based training opportunities that identify gaps in cyber security and incident response processes. These exercises are also a highly valuable internal training tool.

COUNTER THREAT ASSESSMENT

A highly customized evaluation that identifies the threats and attack groups most likely to negatively affect your organization and allows you to prioritize investments based on applicable risk.

**DON'T WAIT UNTIL AN
ADVERSARY GAINS ACCESS TO
YOUR ORGANIZATION TO FIND
OUT IF YOUR NETWORK IS COMPROMISED**

HEAR FROM OUR CLIENTS

"We operate in an industry that is heavily targeted by sophisticated adversaries. 'CrowdStrike Services' truly customized offerings gave us the confidence to anticipate threats, prepare our networks and better defend against cyber attacks."
