

CROWDSTRIKE STORE

Reinvent your security with a single-cloud application ecosystem

THE POWER OF THE APP ECOSYSTEM: REINVENT ENTERPRISE SECURITY

Historically, one of the biggest challenges for organizations has been the need to architect complex security suites that employ different vendor solutions to solve security and compliance requirements, without compromising business agility. Each new security solution requires the deployment of additional agents on the endpoint, resulting in agent bloat and impacting performance. There is also significant time and resources required for the discovery, trial, deployment and management of new security vendors.

CrowdStrike Falcon® cloud-delivered platform is a leader in endpoint security — providing real-time protection and visibility for endpoints delivered via a single lightweight agent. The CrowdStrike Store leverages the power of the open and extensible cloud platform, enabling security applications to be built with minimal architectural changes and delivered via a seamless, unified user interface. All of CrowdStrike's security technology partner applications are CrowdStrike-certified — built and tested for delivery via the Falcon agent and leveraging the CrowdStrike Security Cloud for scale and telemetry.

The CrowdStrike Store allows you to maximize your investment in the Falcon platform by discovering, deploying, and managing new certified third-party applications and add-ons to solve different security and compliance use cases. This can be achieved without the hassle of installing additional agents and platform deployments, which helps increase business agility and productivity for your organization.

KEY BENEFITS

Maximize your investment in the Falcon platform, while improving your security posture

Solve new security use cases with reduced time and resources using a single platform and agent

Increase productivity by seamlessly deploying CrowdStrike® and certified partner applications from a unified user interface

Gain the flexibility to discover, try and buy free and paid-for apps and add-ons from CrowdStrike and trusted partners.

KEY CAPABILITIES

- **Meet security requirements:** The CrowdStrike Store is easily accessible from the Falcon management console. It is organized into categories, so you can quickly and efficiently discover and install applications and add-ons that fit your business requirements.
- **Maximize infrastructure investment:** Discover, try and deploy CrowdStrike and third-party apps to solve new security challenges, and extend the power and scale of the Falcon platform.
- **Minimize operational complexity:** Simplify your security deployments without performance impact due to agent bloat, and with a single unified management console for all CrowdStrike and third-party applications.
- **Streamline security operations:** Your security and operations teams will have a single management console for different security applications that ensures a seamless support and troubleshooting experience.
- **Consolidate data extraction:** Using a single agent for all data collection eliminates the need for different security applications to gather and store the same telemetry multiple times and across multiple disconnected datasets.

ABOUT CROWDSTRIKE

CrowdStrike is a leader in cloud-delivered endpoint protection. The CrowdStrike Falcon platform offers instant visibility and protection across the enterprise and prevents attacks on endpoints on or off the network. Falcon seamlessly unifies next-generation AV with best-in-class endpoint detection and response, backed by 24/7 managed hunting. There's much more to the story of how Falcon has redefined endpoint protection but there's only one thing to remember about CrowdStrike: We stop breaches.

UNLOCKING THE POWER OF THE PLATFORM

Truefort

“TrueFort’s partnership with CrowdStrike leverages the power of cloud computing to offer our joint customers a fully-automated platform providing comprehensive visibility and behavioral analytics to protect critical applications and data.”

Sameer Malhotra
CEO, Truefort

Intersec

“Intersec’s UEBA, combined with CrowdStrike’s cloud-native architecture and rich endpoint data, enables customers to protect high-value information by quickly and accurately identifying unusual, risky behavior before damage is done.”

Mark Smialowicz
CEO, Intersec
