

# CROWDSTRIKE STORE

Accelerate time-to-market with a single-cloud application ecosystem

## THE POWER OF THE APP ECOSYSTEM: DELIVER FASTER, SMARTER AND MORE EFFECTIVE ENTERPRISE SOLUTIONS

Historically, one of the biggest challenges for organizations has been the need to architect complex security suites to solve security and compliance requirements, without compromising business agility. The need to deploy additional agents and new platforms can overwhelm security and operations teams — causing friction when adopting and investing in new security products.

The CrowdStrike® Store is where customers will be able to discover, try, buy and deploy trusted and certified third-party applications and add-ons that extend their investment in the CrowdStrike Falcon® platform. Organized into categories, customers can quickly purchase applications and add-ons, and seamlessly integrate them within their existing security stack, without compromising endpoint performance and operational simplicity.

CrowdStrike has focused on creating an open and extensible cloud-native platform with a single lightweight agent. It provides both web-scale and telemetry, streamlining application development for faster, smarter, and more effective business solutions. The CrowdStrike Threat Graph™ provides rich data sets from all endpoints in hybrid environments, which can be leveraged for solving new security and compliance use cases. Unified security cloud ecosystem and agent consolidation provides a frictionless enterprise security experience for customers, accelerating solution adoption and retention.

Trusted partners can bring innovations to market faster by eliminating the need for investing in creating new agents or building new web-scale cloud services for data collection. Instead, you can leverage the universal Falcon agent for on-device streaming analytics and the CrowdStrike Threat Graph massive data set for analytics and cloud storage. CrowdStrike's open API platform allows you to easily develop and deploy new applications and integrations on a unified security ecosystem. You can efficiently market your applications and add-ons to existing Falcon customers through a single user interface and management console, offering them a seamless security integration experience.

## KEY BENEFITS

---

Ability to reach thousands of CrowdStrike customers with ready-made applications and add-ons

---

Focus on your core business by leveraging powerful scale and telemetry of Falcon platform architecture

---

Provides frictionless integration for customers to try, buy and deploy your applications and add-ons

---

Improves customer engagement by accessing existing CrowdStrike technology and expertise

## KEY CAPABILITIES

- **Accelerate time to market:** Efficiently market your applications and add-ons to an existing large base of Falcon customers through a unified management console. Provide customers with a seamless experience to better architect and manage their security stacks, without compromising business agility.
- **Immediate time-to-value:** Improve business opportunities by bringing innovation and new product capabilities to market faster, without investing the time and money needed to build, maintain and support additional agents and web-scale cloud platforms.
- **Leverage existing technology:** Focus on your core business by leveraging the power of cloud-native architecture and a universal endpoint agent for enterprise web-scale and rich telemetry data.
- **Massive data sets:** Use Threat Graph to get access to petabytes of data for solving security and compliance challenges and providing differentiated products.
- **Robust resource framework:** As a CrowdStrike Store partner, you have access to development and support resources that enable you to serve your customers efficiently and accelerate customer adoption.

## ABOUT CROWDSTRIKE

CrowdStrike is a leader in cloud-delivered endpoint protection. The CrowdStrike Falcon platform offers instant visibility and protection across the enterprise and prevents attacks on endpoints on or off the network. Falcon seamlessly unifies next-generation AV with best-in-class endpoint detection and response, backed by 24/7 managed hunting. There's much more to the story of how Falcon has redefined endpoint protection but there's only one thing to remember about CrowdStrike: We stop breaches.

## UNLOCKING THE POWER OF THE FALCON PLATFORM

### Truefort

“TrueFort’s partnership with CrowdStrike leverages the power of cloud computing to offer our joint customers a fully-automated platform providing comprehensive visibility and behavioral analytics to protect critical applications and data.”

**Sameer Malhotra**  
CEO, Truefort

### Intersect

“Intersect’s UEBA, combined with CrowdStrike’s cloud-native architecture and rich endpoint data, enables customers to protect high-value information by quickly and accurately identifying unusual, risky behavior before damage is done.”

**Mark Smialowicz**  
CEO, Intersect
