

CLOUD SECURITY SERVICES

Enhance the security posture of multi-cloud infrastructure and platforms

SECURE YOUR CLOUD FROM ADVANCED THREATS AND EXPLOITS

Cloud infrastructure and platforms play an important role in accelerating the digital transformation of a company's business processes and user experiences. Securing the workloads that enable those processes and experiences is equally important and is the joint responsibility of both the cloud service provider and the business that is consuming the cloud resources.

Adversaries are looking to take advantage of those that lack the awareness of their responsibility and are seeking to exploit any ineffective cloud security settings and take advantage of common misconfigurations like:

- Improper public access configured and exposed access keys
- Excessive account permissions and ineffective identity architecture
- Disabled logging, missing alerts and inadequate network segmentation
- Public snapshots and images, and open databases and caches

CrowdStrike Cloud Security Services helps you prepare for advanced attacks on your cloud resources, respond to breaches in your cloud environment and enhance the security posture of your cloud infrastructure and platforms. These services bring deep cloud security expertise that comes from building and securing the cloud-native CrowdStrike Falcon® platform, combined with the extensive threat intelligence that CrowdStrike incident responders use to understand the latest tactics, techniques and tradecraft used by adversaries to exploit cloud environments.

KEY BENEFITS

Avoid cloud misconfigurations:
Understand and remediate cloud security misconfigurations in Azure, AWS, GCP and O365 that could be exploited by adversaries

Identify cloud attacks:
Determine if there is current (or past) adversary activity within your cloud environment

Test cloud defenses:
Conduct offensive and defensive tests of your cloud infrastructure and platforms

Stop cloud breaches:
Stop targeted attacks and recover your cloud environment with speed and precision

KEY SERVICE FEATURES

As a leading provider of endpoint and cloud workload protection technology, CrowdStrike delivers a full range of cloud security services that leverage that technology to help you prepare for an advanced attack on your cloud, stop a breach in your cloud environment and enhance the security posture of your cloud infrastructure and platforms.

RESPOND TO A BREACH IN YOUR CLOUD ENVIRONMENT

- **Incident response for cloud:** Handle critical security incidents and conduct comprehensive forensic analysis to resolve immediate cyberattacks in your cloud environment.

PREPARE FOR AN ADVANCED ATTACK ON YOUR CLOUD RESOURCES

- **Red team/blue team exercise for cloud:** Prepare your cybersecurity team and learn from experts as CrowdStrike's red team attacks and its blue team helps your team defend against a targeted attack on your cloud environment.

ENHANCE THE SECURITY POSTURE OF YOUR CLOUD PLATFORMS

- **Cloud security assessment:** Leveraging the Falcon Horizon platform and our observations from the front lines, gain actionable insights into ineffective cloud settings, cloud security misconfigurations and deviations from recommended cloud security architecture to help you prevent cloud breaches.
- **Cloud compromise assessment:** Identify any ongoing or past attacker activity in your cloud environment and remove any active threats from your network.

WEAPONIZE YOUR FALCON CLOUD SECURITY SOLUTIONS

- **Falcon operational support for cloud security:** Receive expert guidance and implementation support for the deployment, configuration and weaponization of your Falcon Cloud Security solutions, including: Falcon Cloud Workload Protection (CWP), Falcon Horizon, Falcon Discover for Cloud, and CrowdStrike Container Security.

ABOUT CROWDSTRIKE SERVICES

CrowdStrike Services delivers Incident Response, Technical Assessments, Training, and Advisory Services that help you prepare to defend against advanced threats, respond to widespread attacks, and enhance your cybersecurity practices and controls.

We help our customers assess and enhance their cybersecurity posture, test their defenses against real-world attacks, respond to incidents, accelerate forensic investigations, and recover from a breach with speed and precision. Harnessing the power of our Security Cloud and the CrowdStrike Falcon® platform, we help you protect critical areas of enterprise risk and hunt for threats using adversary focused cyber threat intelligence to identify, track and prevent attacks from impacting your business and brand.

CrowdStrike: **We stop breaches.**

WHY CHOOSE CROWDSTRIKE?

CrowdStrike Security Cloud:

CrowdStrike has built its business around our secure cloud-native Falcon platform. Cloud security is critical to our business as we run one of the largest scale cloud-native security platforms with more than 15PB of security telemetry data and ingesting over 7 trillion security events per week.

Deep cloud security expertise:

CrowdStrike has more than a decade of experience securing the cloud-native Falcon platform. This platform enables the CrowdStrike mission of stopping breaches by ultimately securing the endpoints and cloud workloads for thousands of customers across the globe.

Comprehensive indicators

of misconfiguration: The CrowdStrike Falcon Horizon™ module uses indicators of misconfiguration (IOMs) to detect ineffective cloud security settings and misconfigurations within dynamic cloud environments before they can be exploited by adversaries.

Extensive Cloud Threat

Intelligence: CrowdStrike incident responders use the extensive threat intelligence in the Falcon platform. This visibility provides us detailed knowledge of threat actors and the tactics, techniques and tradecraft they use to exploit cloud environments.
