

# PATHWAY TO ENHANCED CLOUD SECURITY

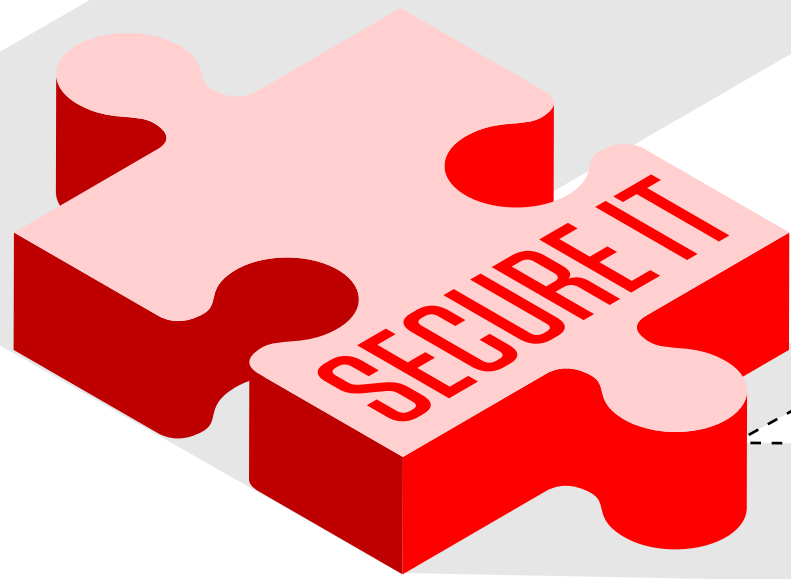

## CREATE A SECURITY STRATEGY FOR HYBRID IT

- Secure your cloud your way: private, public, hybrid
- Maximize IT capabilities for better outcomes
  - Ensure security consistency across the hybrid estate
  - Understand the mindset of the adversaries
- Protect critical data and crown jewels
  - Future-proof integrations and security

## SHIFT LEFT AND AUTOMATE DEVOPS

- Build securely in the cloud
- Accelerate application delivery and time to market
- Automate security across the CI/CD pipelines
- Eliminate coding errors and protect container and serverless environments
  - Enhance knowledge and understanding of cloud adversaries

## SEE MORE – KNOW MORE – DO MORE

- Gain visibility across all clouds and applications
- Simplify management and discovery of cloud resources and applications
- Automate and enforce security policies, compliance and governance
  - Prevent identity-based threats
  - Protect the control plane

## STOP CLOUD BREACHES

- Prevent and eliminate security threats in real time for any workload, anywhere
  - Automate cloud breach prevention
- Investigate and remediate incidents faster
  - Uncover hidden threats with integrated cloud threat hunting and response

Improve your cloud security without compromising performance. Request a demo and learn more about CrowdStrike cloud security solutions at <https://www.crowdstrike.com/cloud-security/>

## About CrowdStrike

CrowdStrike has redefined security with the world's most advanced cloud-native platform that protects and enables the people, processes and technologies that drive modern enterprise. CrowdStrike secures the most critical areas of enterprise risk – endpoints and cloud workloads, identity, and data – to keep customers ahead of today's threats and stop breaches. Powered by the CrowdStrike Security Cloud, the CrowdStrike Falcon Platform leverages real-time indicators of attack, threat intelligence, evolving adversary tradecraft and enriched telemetry from across the enterprise to deliver hyper-accurate detections, automated protection and remediation, elite threat hunting and prioritized observability of vulnerabilities. Purpose-built in the cloud with a single lightweight-agent architecture, customers benefit from unmatched scalability, superior protection and performance, reduced complexity and immediate time-to-value.

CrowdStrike: We stop breaches.
