

Supercharge Your Security Transformation

Kill complexity in your security stack

38%
are experienced

22%
of surveyed organizations that cite these challenges are advanced in terms of the IT security solutions they have implemented.

Most organizations with mature security solutions grapple with solution complexity and integration challenges

7%
are foundational

34%
are intermediate

71%

of security professionals say integration complexity with other technology and security stacks requires improvement

92%

of security professionals say their organization has had operational challenges with implementation

94%

have had issues when purchasing new IT security solutions for their organization

Challenges with IT Stack Modernization

67%

report cost effectiveness requires improvement

40%

cite that the IT security solution(s) used in their organization do not seamlessly integrate together

82%

admit that their organizations' IT security would be more effective if all of their IT security solutions shared the same aggregated pool of data

The War for Talent Is Make or Break

64%

report their organization needs to have IT security specialists to use their security solutions

43%

say they lack trained professionals to get the right actions underway

76%

plan to recruit more IT security professionals over the next 12 months

Futureproof Security with Frameworks

96%

believe that "work-from-anywhere" will become normalized in the future

70%

of respondents' organizations have adopted or plan to adopt the MITRE ATT&CK® framework

62%

are currently building cybersecurity frameworks into their organizations' security ecosystem

Supercharge Your Security Transformation

1. Maximize the value of your current IT security solutions with simplicity and efficacy
2. Modernize your IT security solutions in order to ensure they seamlessly integrate together
3. Accelerate security framework adoption to help improve IT security overall

Modernize your security stack with trusted, best-of-breed solutions delivered by the CrowdStrike Falcon platform powered by the CrowdStrike Security Cloud and world-class AI for end-to-end coverage that supercharges your security transformation.

Research Methodology

CrowdStrike commissioned independent technology market research specialist Vanson Bourne to uncover the issues security teams face as they contend with accelerated transformations and modern threat actors. A total of 900 IT security decision makers and professionals were interviewed in January and February 2021, with equal representation across North America (300), Europe (300) and APJ (300) regions. Respondents were required to be from organizations with at least 250 global employees and from across the private and public sectors. For more information, download the [white paper](#).

About CrowdStrike

CrowdStrike Holdings, Inc. (Nasdaq: CRWD), a global cybersecurity leader, has redefined modern security with the world's most advanced cloud-native platform for protecting critical areas of enterprise risk - endpoints and cloud workloads, identity and data.

Powered by the CrowdStrike Security Cloud, the CrowdStrike Falcon® platform leverages real-time indicators of attack, threat intelligence, evolving adversary tradecraft and enriched telemetry from across the enterprise to deliver hyper-accurate detections, automated protection and remediation, elite threat hunting and prioritized observability of vulnerabilities.

Purpose-built in the cloud with a single lightweight-agent architecture, the Falcon platform enables customers to benefit from rapid and scalable deployment, superior protection and performance, reduced complexity and immediate time-to-value.

CrowdStrike: **We stop breaches.**
