Breaches Stop Here
Cloud-Delivered Protection Across Endpoints, Cloud Workloads, Identity and Data
They said it was impossible to provide complete cloud-native protection using a single lightweight agent with no impact on user performance. CrowdStrike proved them wrong. The cloud-native CrowdStrike Falcon platform uniquely combines technology, intelligence and expertise to deliver comprehensive end-to-end security across the critical areas of enterprise risk: endpoints, cloud workloads, identity and data.

By leveraging the CrowdStrike Security Cloud and the lightweight Falcon agent to collect data once and use it many times, the Falcon platform addresses the complete gamut of security challenges while simultaneously eliminating cost and complexity.

The Falcon platform continues to grow, delivering industry-leading protection covering:

- Endpoint security and extended detection and response (XDR)
- Cloud security
- Managed services
- Threat intelligence
- Identity protection
- Security and IT operations
- Next-gen SIEM and log management
- Data protection

With the Falcon platform, customers receive rapid and scalable deployment, superior protection and performance, reduced complexity, and immediate time-to-value.
PROTECTION THAT POWERS YOU

Automatically predict and prevent threats in real time

Purpose-built in the cloud with a single lightweight-agent architecture, the CrowdStrike Falcon® platform protects the most critical areas of enterprise risk — endpoints and cloud workloads, identity and data.

Powered by the CrowdStrike Security Cloud, the Falcon platform leverages real-time indicators of attack, threat intelligence, evolving adversary tradecraft and enriched telemetry from across the enterprise to deliver hyper-accurate detections, automated protection and remediation, elite threat hunting, and prioritized observability of vulnerabilities.
